EDITORIAL

- D.M. Roy:** Editorial 1

PAPERS

- V. Lilkov, E. Dimitrova, and S. Gaidardzhiev:** Microscopic and laser granulometric analysis of hydrating cement suspensions 3
- I. Teoreanu and G. Guslicov:** Mechanisms and effects of additives from the dihydroxy-compound class on Portland cement grinding 9
- R. Yang, C.D. Lawrence, C.J. Lynsdale, and J.H. Sharp:** Delayed ettringite formation in heat-cured Portland cement mortars 17
- P.-V. Vlachou and J.-M. Piau:** Physicochemical study of the hydration process of an oil well cement slurry before setting 27
- Q. Yu, K. Sawayama, S. Sugita, M. Shoya, and Y. Isojima:** The reaction between rice husk ash and $\text{Ca}(\text{OH})_2$ solution and the nature of its product 37
- Q. Yang:** Inner relative humidity and degree of saturation in high-performance concrete stored in water or salt solution for 2 years 45
- I.W. Hamilton and N.M. Sammes:** Encapsulation of steel foundry bag house dusts in cement mortar 55
- G. Renaudin, M. Francois, and O Evrard:** Order and disorder in the lamellar hydrated tetracalcium monocarboaluminate compound 63
- S.P. Jiang, B.-G. Kim, and P.-C. Aïtcin:** Importance of adequate soluble alkali content to ensure cement/superplasticizer compatibility 71
- V.G. Papadakis:** Experimental investigation and theoretical modeling of silica fume activity in concrete 79
- J. Monzó, J. Payá, M.V. Borrachero, and E. Peris-Mora:** Mechanical behavior of mortars containing sewage sludge ash (SSA) and Portland cements with different tricalcium aluminate content 87
- A. Sacconi and V. Magnaghi:** Durability of epoxy resin-based materials for the repair of damaged cementitious composites 95
- J.-Y. Park and B. Batchelor:** Prediction of chemical speciation in stabilized/solidified wastes using a general chemical equilibrium model II: Doped waste contaminants in cement porewaters 99
- S. Martinez-Ramirez:** Influence of SO_2 deposition on cement mortar hydration 107
- T. Bakharev, J.G. Sanjayan, and Y.-B. Cheng:** Alkali activation of Australian slag cements 113

G.K.D. Pushpalal, T. Kobayashi, T. Kawano, and N. Maeda: The processing, properties, and applications of calcium aluminate-phenol resin composite	121
K.O. Kjellsen and E.H. Atlassi: Pore structure of cement silica fume systems: Presence of hollow-shell pores	133
G. De Schutter: Hydration and temperature development of concrete made with blast-furnace slag cement	143

Papers Presented at the Materials Research Society Symposium on Advances in Materials for Cementitious Composites

Boston, Massachusetts, December 1–3, 1997

EDITORIAL

M. Silsbee: Symposium on "Advances in Materials for Cementitious Composites," The Materials Research Society, December 1–3, 1997	157
---	------------

PAPERS

S. Song, H.M. Jennings: Pore solution chemistry of alkali-activated ground granulated blast-furnace slag	159
J. Péra, J. Ambroise, M. Chabannet: Properties of blast-furnace slags containing high amounts of manganese	171
M. Andac, F.P. Glasser: Long-term leaching mechanisms of Portland cement-stabilized municipal solid waste fly ash in carbonated water	179
A. Gadayev, B. Kodess: By-product materials in cement clinker manufacturing	187
S.B. Park, E.S. Yoon, B.I. Lee: Effects of processing and materials variations on mechanical properties of lightweight cement composites	193
P.J. Kim, H.C. Wu, Z. Lin, V.C. Li, B. deLhoneux, S.A.S. Akers: Micromechanics-based durability study of cellulose cement in flexure	201
E. Salmon, M. Ausloos, N. Vandewalle: Water invasion, freezing, and thawing in cementitious materials	209
S.-S. Hong, G.-G. Lim, B.-K. Lee, B.-J. Lee, J.-S. Rho: Mechanical strength enhancement of lower hydraulicity cementitious solid wastes using anhydrite and pozzolanic materials	215
G.-G. Lim, S.-S. Hong, D.-S. Kim, B.-J. Lee, J.-S. Rho: Slump loss control of cement paste by adding polycarboxylic type slump-releasing dispersant	223
C.Y. Rha, C.E. Kim, C.S. Lee, K.I. Kim, S.K. Lee: Preparation and characterization of absorbent polymer-cement composites	231

B. Mu, Z. Li, S.N.C. Chui, J. Peng: Cementitious composite manufactured by extrusion technique	237
D. Sohn, D.L. Johnson: Microwave curing effects on the 28-day strength of cementitious materials	241
D.M. Roy: Alkali-activated cements: Opportunities and challenges	249
S.D. Chen, C.H. Hwang, K.C. Hsu: The effects of sulphonated phenolic resins on the properties of concrete	255
S. Rols, J. Ambroise, J. Péra: Effects of different viscosity agents on the properties of self-leveling concrete	261
A. Schwartzentruber, J.-P. Bournazel, J.-N. Gacel: Hydraulic concrete as a deep-drawing tool of sheet steel	267
K.K. Aligizaki, P.D. Cady: Air content and size distribution of air voids in hardened cement pastes using the section-analysis method	273
M.R. de Rooij, J.M.J.M. Bijen, G. Frens: Active thin sections to study syneresis	281
R.A. Livingston, M. Manghnani, M. Prasad: Characterization of Portland cement concrete microstructure using the scanning acoustic microscope	287

PAPERS

A. Hauser, U. Eggenberger, and T. Mumenthaler: Fly ash from cellulose industry as secondary raw material in autoclaved aerated concrete	297
J.O. Odigure: Grindability of cement clinker from raw mix containing metallic particles	303
M. Singh and M. Garg: Cementitious binder from fly ash and other industrial wastes	309
L. Li, A.A. Sagüés, and N. Poor: In situ leaching investigation of pH and nitrite concentration in concrete pore solution	315
M.M. Reda, N.G. Shrive, and J.E. Gillott: Microstructural investigation of innovative UHPC	323
H.S. Abdelgader: How to design concrete produced by a two-stage concreting method	331
A. Bouguerra, H. Sallée, F. de Barquin, R.M. Dheilily, and M. Quéneudec: Isothermal moisture properties of wood-cementitious composites	339
P. Yan, W. Yang, X. Qin, and Y. You: Microstructure and properties of the binder of fly ash-fluorogypsum-Portland Cement	349
N.K. Katyal, R. Parkash, S.C. Ahluwalia, and G. Samuel: Influence of titania on the formation of tricalcium silicate	355
J.-Y. Park and B. Batchelor: Prediction of chemical speciation in stabilized/solidified wastes using a general chemical equilibrium model: Part I. Chemical representation of cementitious binders	361

M. Mouret, A. Bascoul, and G. Escadeillas: Microstructural features of concrete in relation to initial temperature—SEM and ESEM characterization	369
W.J. McCarter, G. Starrs, and T.M. Chrisp: Immittance spectra for Portland cement/fly ash-based binders during early hydration	377
Q. Yang and X. Wu: Factors influencing properties of phosphate cement-based binder for rapid repair of concrete	389
S. Tandon and K.T. Faber: Effects of loading rate on the fracture of cementitious materials	397
J.-H. Kim, R.E. Robertson, and A.E. Naaman: Structure and properties of poly(vinyl alcohol)-modified mortar and concrete	407
COMMUNICATIONS	
C. Andrade, M. Castellote, C. Alonso, and C. González: Relation between colourimetric chloride penetration depth and charge passed in migration tests of the type of standard ASTM C1202-91	417
H. Yan, W. Sun, and H. Chen: The effect of silica fume and steel fiber on the dynamic mechanical performance of high-strength concrete	423
Y. Wang and D.D.L. Chung: Effect of embedded steel on the compressive damage behavior of cement mortar	427
B. Singh, A.J. Majumdar, and K. Quillin: Properties of BRECEM: Ten-year results	429
Z.-Q. Shi and D.D.L. Chung: Carbon fiber-reinforced concrete for traffic monitoring and weighing in motion	435
M. Poznič, R. Gabrovšek, and M. Novič: Ion chromatography determination of chloride and sulphate in cement	441
S. Wen and D.D.L. Chung: Piezoresistivity in continuous carbon fiber cement-matrix composite	445
Y. Xu and D.D.L. Chung: Improving the workability and strength of silica fume concrete by using silane-treated silica fume	451
F.G. Collins and J.G. Sanjayan: Workability and mechanical properties of alkali activated slag concrete	455
F. Collins and J.G. Sanjayan: Effects of ultra-fine materials on workability and strength of concrete containing alkali-activated slag as the binder	459
NEWS ITEMS	463

PAPERS	
Y. Fan, S. Yin, Z. Wen, J. Zhong: Activation of fly ash and its effects on cement properties	467
P. Sandberg: Studies of chloride binding in concrete exposed in a marine environment	473

S. Bagosi, L.J. Csetenyi: Immobilization of caesium-loaded ion exchange resins in zeolite-cement blends	479
M.D.A. Thomas, P.B. Bamforth: Modelling chloride diffusion in concrete: Effect of fly ash and slag	487
H.A. Toutanji, Z. Bayasi: Effect of curing procedures on properties of silica fume concrete	497
K. Fukuda, H. Taguchi: Hydration of α'_L - and β -dicalcium silicates with identical concentration of phosphorus oxide	503
P. Navi, C. Pignat: Three-dimensional characterization of the pore structure of a simulated cement paste	507
S.R. Hillier, C.M. Sangha, B.A. Plunkett, P.J. Walden: Long-term leaching of toxic trace metals from Portland cement concrete	515
G. Calloni, P. D'Antona, N. Moroni: A new rheological approach helps formulation of gas impermeable cement slurries	523
F.A. Rodrigues, P.J.M. Monteiro, G. Sposito: The alkali-silica reaction: The surface charge density of silica and its effect on expansive pressure	527
M. Tokyay: Effect of chemical composition of clinker on grinding energy requirement	531
F. Aköz, F. Türker, S. Koral, N. Yüzer: Effects of raised temperature of sulfate solutions on the sulfate resistance of mortars with and without silica fume	537
D. Stephan, H. Maleki, D. Knöfel, B. Eber, R. Härdtl: Influence of Cr, Ni, and Zn on the properties of pure clinker phases: Part I. C_3S	545
I. Tanaka, N. Suzuki, Y. Ono, M. Koishi: A comparison of the fluidity of spherical cement with that of broad cement and a study of the properties of fresh concrete using spherical cement	553
A. Castel, R. François, G. Arliguie: Effect of loading on carbonation penetration in reinforced concrete elements	561
O.M. Jensen, P.F. Hansen: Influence of temperature on autogenous deformation and relative humidity change in hardening cement paste	567
A. Loukili, A. Khelidj, P. Richard: Hydration kinetics, change of relative humidity, and autogenous shrinkage of ultra-high-strength concrete	577
K.O. Ampadu, K. Torii, M. Kawamura: Beneficial effect of fly ash on chloride diffusivity of hardened cement paste	585
T. Sebök, O. Stráeněl: Relationships between the properties of ligninsulphonates and parameters of modified samples with cement binders. Part II. Study of relationships between molar parameters of ligninsulphonates and characteristics of the samples tested	591
COMMUNICATIONS	
S. Chatterji: Evidence of variable diffusivity of ions in saturated cementitious materials	595
İ.A. Altun: Influence of heating rate on the burning of cement clinker	599
M.S. Morsy: Effect of temperature on electrical conductivity of blended cement pastes	603

F. Collins, J.G. Sanjayan: Strength and shrinkage properties of alkali-activated slag concrete containing porous coarse aggregate	607
K. Kohno, T. Okamoto, Y. Isikawa, T. Sibata, H. Mori: Effects of artificial lightweight aggregate on autogenous shrinkage of concrete	611
D.P. Bentz, C.J. Haecker: An argument for using coarse cements in high-performance concretes	615
H.B. Basri, M.A. Mannan, M.F.M. Zain: Concrete using waste oil palm shells as aggregate	619
J.I. Escalante, G. Mendoza, H. Mancha, J. López, G. Vargas: Pozzolanic properties of a geothermal silica waste material	623
S. Chatterji: Aspects of the freezing process in a porous material–water system: Part 1. Freezing and the properties of water and ice	627
L. Jiang, Y. Guan: Pore structure and its effect on strength of high-volume fly ash paste	631
NEWS ITEMS	635
